Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

MANAGEMENT DISCUSSION AND ANALYSIS BUSINESS REVIEW

The Group's principal place of business is in Jingzhou, Hubei Province, the PRC. During the Period, the Group was involved in the sales of CNG and LNG in the PRC.

Sales of CNG and LNG

The Group mainly supplies CNG and derives revenue mainly from the distribution of CNG to both (i) retail customers which are mostly vehicular end-users; and (ii) wholesale customers which are urban gas companies, gas refuelling station operators and industrial users. The principal product offering is CNG and the Group purchases natural gas from PetroChina Company Limited ("PetroChina"). The Group also supplies LNG to some wholesale customers.

FINANCIAL REVIEW

Revenue

Revenue amounted to approximately RMB44.4 million for the six months ended 30 June 2024, increased by approximately RMB13.1 million or 41.9% when compared with approximately RMB31.3 million for the corresponding period of 2023. The increase was primarily due to the significant increase in sales of LNG, partially offset by the decrease in the sales of CNG, as stated below.

The revenue from sales of CNG to wholesale customers decreased by approximately RMB1.1 million or 5.9% from approximately RMB18.7 million for the six months ended 30 June 2023 to approximately RMB17.6 million for the six months ended 30 June 2024, primarily due to a slight decrease in the sales volume of CNG to wholesale customers. Moreover, the revenue from sales of CNG to retail customers decreased by approximately RMB1.8 million or 22.5% from approximately RMB8.0 million for the six months ended 30 June 2023 to approximately RMB6.2 million for the six months ended 30 June 2024. This is primarily due to one of the Group's major retail customers gradually switched its operated buses to electric vehicles instead of CNG vehicles.

During the Period, the Group also derived revenue of approximately RMB20.6 million from sales of LNG (six months ended 30 June 2023: approximately RMB4.3 million). During the six months ended 30 June 2023, the Group derived revenue of approximately RMB0.2 million from provision of transmission services of CNG.

Cost of sales

Cost of sales amounted to approximately RMB40.6 million for the six months ended 30 June 2024, representing an increase of approximately RMB13.0 million or 47.1% as compared to approximately RMB27.6 million for the six months ended 30 June 2023, which was primarily due to the increase in cost of inventories sold by approximately RMB17.6 million or 85.4% from approximately RMB20.6 million for the six months ended 30 June 2023 to approximately RMB38.2 million for the six months ended 30 June 2024, as a result of the increase in the sales volume of LNG.

Gross profit

Gross profit increased by approximately RMB0.2 million from approximately RMB3.7 million for the six months ended 30 June 2023 to approximately RMB3.9 million for the six months ended 30 June 2024. Gross profit margin decreased by 3.2% from 11.9% for the six months ended 30 June 2023 to 8.7% for the six months ended 30 June 2024, mainly due to (i) the impact of high procurement cost of the natural gas which cannot be fully passed on to our customers in a timely manner due to the pricing guidelines imposed by Hubei Price Bureau and Jingzhou Price Bureau; and (ii) lower profit margin for the sales of LNG.

FINANCIAL REVIEW (cont'd)

The increase was mainly attributable to the increase in legal and professional fee and consultancy fee of approximately RMB0.7 million and increase in staff costs of approximately RMB0.7 million.

Finance costs

Finance costs represented interest on lease liabilities.

Taxation

No current income tax expense had been provided for the six months ended 30 June 2024 as there were no assessable profits generated during the Period and there were no significant deferred tax for the Period.

Loss for the period

Loss attributable to the owners of the Company for the six months ended 30 June 2024 was approximately RMB4.4 million, increased by approximately RMB1.7 million or 63.0% as compared to approximately RMB2.7 million for the same period last year. PROSPECTS

Looking ahead, the global economic landscape is expected to remain challenging. Although global inflation rates and interest rates are predicted to drop moderately in 2024, persistent geopolitical tensions and the slowdown in the Chinese property market may extend the existing financial difficulties and result in growth setbacks. Consequently, the overall investment and economic environment is likely to remain highly uncertain.

The Group has been actively exploring new business opportunities in order to diversify its income source, and eventually to maximise the return to the shareholders of the Company. On 11 July 2024, Hubei Tonglin Natural Gas Service Company Limited* (湖北桐林石油天然氣服務有限公司) (“Tonglin Gas”), an indirect wholly-owned subsidiary of the Company, entered into a memorandum of understanding with Jingmen Jinhaoli Natural Gas Co., Ltd.* (荊門市金豪力天然氣有限公司) (the “Target Company”) in relation to a proposed investment in the Target Company by way of subscription of part of the shares (51% or more) of the Target Company. The Target Company is principally engaged in the construction of natural gas pipelines, which are used to transport natural gas from production facilities or storage sites to distribution points such as residential, commercial and industrial areas. To the best of the knowledge, information and belief of the Directors, after having made all reasonable enquiries, the Target Company and its ultimate beneficial owners are third parties independent of the Company and its connected persons. The Directors are of the view that the proposed investment in the Target Company will allow the Group to gain more access to pipelines and infrastructure related to natural gas transportation, leading to additional revenue for the Group through provision of transmission services. As at the date of this report, the parties have not entered into any legally binding agreement in relation to the proposed investment.

Looking forward, the Group is optimistic about the growth of consumption of natural gas along with China improving its energy consumption structure by shifting from coal to cleaner energy such as natural gas and other renewable energy. In recent years, the PRC government has issued a series of policies to support further development and utilisation of natural gas and natural gas vehicles. Besides, the PRC government is making every effort to prevent and control pollution and to promote clean production in enterprises. The Group expects that these policies would stimulate the natural gas industry and would foster development of other related products. The Group will endeavour to seize the growth potential resulting from such policies and industry trends.

The Group will take appropriate measures as necessary to minimise the risks exposed and will act prudently in considering any new investment opportunities, and will in the meantime explore additional ways to increase shareholder value.

On 15 December 2023, the Company and CNI Securities Group Limited (the "Placing Agent") entered into a placing agreement (the "Placing Agreement") (as supplemented by a supplemental agreement dated 5 January 2024 (the "Supplemental Placing Agreement") and a supplemental agreement dated 18 January 2024), pursuant to which the Company has conditionally agreed to place, through the Placing Agent on a best effort basis, a maximum of 35,451,000 placing shares at the placing price of HK\$0.658 per placing share (the "Placing") to not less than six placees (the "Placees"), who and whose ultimate beneficial owner(s) are independent third parties. The placing shares rank pari passu in all respects among themselves and with the Shares in issue on the date of allotment and issue of the placing shares. The placing price represents a discount of approximately 17.75% to the closing price of HK\$0.800 per Share as quoted on the Stock Exchange on the date of the Supplemental Placing Agreement; and a discount of approximately 19.95% to the average closing price of HK\$0.822 per Share as quoted on the Stock Exchange for the last five consecutive trading days prior to the date of the Supplemental Placing Agreement. USE OF PROCEEDS *(cont'd)*

As disclosed in the Prospectus, the Company intended to install new facilities at the Jingzhou Primary Station, a gas processing station which acts as a primary station bridging high pressure pipelined gas that is being transmitted from PetroChina to the Group, to enlarge the Group's wholesale customer base and enable the Group to capture both CNG and LNG market. The implementation plan for upgrading infrastructures and facilities of the Jingzhou Primary Station to equip it with LNG processing capacity has been completed during the Year, and the Jingzhou Primary Station is currently able to maintain the pressure and low temperature of LNG, pump and dispense LNG, thereby operating with selling both CNG and LNG.

In relation to the above other implementation plans, the Group has submitted the relevant application and has been in discussion with the government officials on the approval progress. However, due to the demolition of one of the Group's gas refuelling substation located at Shihao Road, Jingzhou, Hubei Province, in July 2021, the Company has been looking for relocation opportunities and will seek approval from the relevant government authorities once the new location is identified. Upon receiving the relevant approval from the government authorities, the Group would carry out feasibility study including environmental impact assessment to further implement the plans. The unutilised net proceeds have been placed with licensed banks in the PRC as at 30 June 2024.

As at the date of this report, the Directors do not anticipate any change to the principal plan as to the use of proceeds.

SHARE OPTION SCHEME (cont'd)

Notes:

1. The share options are subject to the vesting period as follows:
 - (a) 30% of the share options will be vested on, and exercisable from, the date of grant to the expiry of the option period (both days inclusive);
 - (b) a further 30% of the share options will be vested on, and exercisable from, the first anniversary of the date of grant to the expiry of the option period (both days inclusive); and
 - (c) the remaining 40% of the share options will be vested on, and exercisable from, the second anniversary of the date of grant to the expiry of the option period (both days inclusive).
2. The share options are exercisable for a period of five years from the date of grant and the fair values of the share options were calculated using the Binomial Option Pricing Model. The inputs to the model were as follows:

	Share options granted on 23 June 2020	Share options granted on 21 January 2020
Share price at the date of grant (before the Share Consolidation)	HK\$0.130	HK\$0.166
Exercise price per share (before the Share Consolidation) (note 5)	HK\$0.130	HK\$0.166
Expected volatility (%)	42.55	42.33
Risk-free interest rate (%)	0.31	1.62

The expected volatility reflected the assumption that the historical volatility was indicative of future trends, which may not necessarily be the actual outcome.

3. The fair value of the share options granted during the Period was estimated at RMB4,655,000 using the Binomial Option Pricing Model, of which the Group did not recognise any share option expenses during the Period (six months ended 30 June 2023: Nil). The fair value of an option varies with different variables of certain subjective assumptions. Any change to the variables used may materially affect the estimation of the fair value of an option.
4. Share options which are cancelled/lapsed/forfeited prior to their exercise date will be removed from the Company's register of outstanding share options. When the share options are forfeited after the vesting date or are still not exercised at the expiry date, the amount previously recognised in the share option reserve will be transferred to retained profits/accumulated losses as a movement in reserves.
